Software Engineer

Clarip is looking for Software Engineers to join our team. If you are skilled at building web applications and enjoy developing solutions to complex problems then we want to hear from you! Clarip's patented Hybrid Artificial Intelligence technology is disrupting the fast growing Data Privacy industry and we are looking for engineers like you to join our team and make a difference. Clarip's technology is used by the Fortune 500 companies to help protect customer data and comply with the privacy laws around the world. Clarip is conveniently located in the suburbs of Philadelphia.

What we offer
- A career in a fast growing technology company
- Contributing to something that is truly impacting people's lives
- Becoming part of the movement that cares about data privacy
- Excellent compensation and unlimited growth opportunity

Responsibilities
- Write clean, quality, and secure code based on product requirements
- Analyze client needs to develop customized data privacy software solutions
- Configure and deploy cloud instances on AWS
- Apply knowledge of data security and application programming interfaces (Restful APIs)
- Command line skills on LINUX
- Responsible for developing web services, performance tuning, and cron-jobs
- Build interactive web applications, APIs and algorithms
- Optimize for performance, and security
- Develop dashboards with ChartJS and retrieve data from SQL and MongoDB
- Work with a team of engineers and help meet tight deadlines
- Prior work in a SaaS software platform as a full stack or back end developer; responsible for front-end, middleware, and back-end development
- Experience with software stacks such as LAMP stack (Linux, Apache, MySQL, **PHP**), or LEMP stack
- Work with programs such as **Javascript**, ReactJS, JQuery, Bootstrap, Redis, and AJAX
- Research online to obtain supporting libraries and dependencies to develop code
- Past experience with a security-tech or privacy-tech company is a plus

Requirements

- A degree in engineering, computer science, or related
- 1 year of experience building web applications and enterprise software as a software engineer, web developer, or related

Compensation

- Competitive salary, based on the experience
- Performance bonus
- Stock options
- Paid vacation

We are an engineering-focused company: Founders are engineers and the majority of our team members are engineers. Our team is flat in hierarchy and you will likely have more autonomy over your code than what you are previously accustomed to. We are looking for software engineers to spearhead the implementation of our exciting new ideas. You won't be just fixing bugs or maintaining existing codebase - you will be building exciting new features, analyzing metrics, re-designing complex interfaces, and making important technical and product decisions. Life is short. Make an impact. Inspire others. Love what you do! Join us in this incredible journey!
